

Sapiens ALIS Sets New Records on Over-Night and Month-End Data Processing

ALL END-TO-END BATCHES WERE COMPLETED IN LESS THAN TWO HOURS

Orlando, FL – MAY 15, 2012 – At the ACORD LOMA Insurance Systems Forum [Sapiens International Corporation N.V.](#) (NASDAQ and TASE: SPNS), a global provider of innovative insurance software solutions, announces today the detailed results of **Sapiens ALIS** benchmark **on IBM AIX 6**, running on **Power 6** and **Power 7** machines, as conducted at **IBM** labs in **Hursley**, UK. With a database of **over 800,000 active policies**, ALIS was found to be fully capable of handling high load scenarios.

The benchmark test confirms that ALIS is one of the most powerful and robust Life & Pensions applications in the world, suitable for Tier-I and global insurance companies. The results indicated that the system is fully scalable, in a nearly linear way, over the platform used.

All end-to-end overnight batches (including month-end) were completed in less than two hours on the Power 7 configuration and in less than two and a half hours on the Power 6 configuration. The main executed batches were Charges; Billing; Payment dispersal; General Ledger extract; Audit Control; Renewal; and letters production.

Commenting on benchmarking, Mr. Juergen Weiss, Senior Analyst at Gartner, said: “Benchmarking is an important aspect for insurers to assess the future performance of their core insurance application. Gartner sees a tendency among international insurers to establish cross-border transactions, which makes those benchmarks even more important. “

Mr. Roni Al-Dor, President & CEO of Sapiens stated: “This benchmark demonstrates the capabilities of ALIS to scale up to the large data processing volumes of Tier-I and global insurers worldwide. I am confident that our customers will find it as a practical aid in planning their computing needs to support their business growth.”
