

Cloud Deployment for the Modern P&C Insurer

"Cloud is the future for insurance. It would be difficult to envision a competitive carrier without a cloud presence even a year or two from now. However, the migration to the cloud requires significant thought, planning, time and resources." – "How Insurance is Riding the Cloud for Rapid New Growth," [eWeek](#), March 28, 2019.

Seeking a Competitive Advantage

Property & casualty (P&C) insurers aim to gain a competitive advantage and reduce significant amounts of IT spending used to maintain legacy systems, while bringing new products to market faster and more affordably. The obvious approach for those who haven't already made the jump is a shift to cloud-based software solutions that can leverage on-demand hardware, software and human resources, and even offer pay-as-you-go pricing models.

Even P&C carriers that have already switched to the cloud should check that they are working with a single software vendor who is offering the whole package. The most effective outcome will result from a comprehensive, fully integrated, cloud-based, software as a service (SaaS) offering.

Sapiens' P&C Cloud Deployment

Sapiens offers full cloud deployment for [Sapiens CoreSuite for Property & Casualty](#), which is comprised of three fully integrated, yet standalone, components – policy, billing and claims – to help P&C carriers meet and exceed today's requirements, while preparing them for the future.

Carriers can harness Sapiens' end-to-end, cloud-based P&C insurance CoreSuite, along with its complementary digital solutions, while reaping all the benefits of the cloud.

Sapiens P&C CoreSuite provide a fully configurable environment and business-user oriented tools.

Our cloud deployment includes a robust and fully integrated agency and commission management system to support complex hierarchies and commission structures.

Sapiens has partnered with all the leading cloud providers to offer Sapiens CoreSuite for Property & Casualty and accompanying services **over private and public clouds**. Sapiens' cloud deployment includes full infrastructure for operations, plus the option of choosing cloud-related managed services delivered by **Sapiens' highly experienced professional services team**. The cloud and managed services proposition are accompanied by an affordable pricing scheme.

Sapiens CoreSuite over the cloud runs with a flexible, SaaS pricing model and is vendor-agnostic. This starts at point-of-sale and covers the entire insurance lifecycle. **Sapiens' cloud capabilities support tactical product launches within months.**

Sapiens' cloud deployment methodology supports pre-integration with some of the industry's leading third-party packaged solutions. We offer complete system integration and project management services to provide insurers with a single URL to access a fully integrated solution. Sapiens can leverage our partnerships, or integrate with the insurer's enterprise, or preferred third-party solutions.

Business Benefits

- Security
- Enhanced scalability & elasticity
- Cost reduction
- Improved customer engagement
- Single focal point
